

DUKE HOPE IN PRIMARY CARE

A WEBINAR SERIES FOR DUKE CONNECTED CARE

Overview

Health Optimization Program for Elders (HOPE) in Primary Care is a collaboration between Duke Health and its community partners that aims to strengthen our collective capacity to meet the complex care and social needs of the growing older adult population. HOPE in Primary Care offers Duke Connected Care participants FREE access to workforce development activities and resources that help providers align with national efforts to create and foster high-quality healthcare for older adults.

May 19: Goals of Care in the Time of COVID

June 23rd: Social Determinants of Health

July 7th: Social Isolation and Depression

July 21st: Falls Prevention and Physical Safety
