

Associating Medications with a Diagnosis:

THERE ARE SOME INSTANCES WHERE PHARMACIES OR INSURANCE COMPANIES REQUIRE THAT A MEDICATION PRESCRIPTION BE ASSOCIATED WITH A DIAGNOSIS.

Examples include

- Hydroxychloroquine
- Chloroquine
- Lopinavir-ritonavir
- Ribavirin
- Oseltamivir
- Darunavir
- Azithromycin
- Diabetes testing supplies

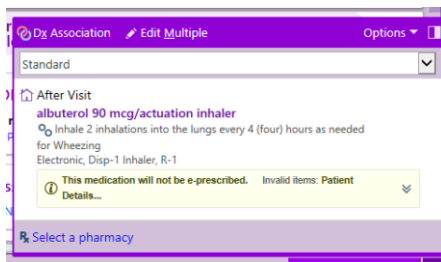

THIS TIP SHEET WILL REMIND YOU HOW TO ASSOCIATE DIAGNOSIS CODE WITH A MEDICATION PRESCRIPTION

Step 1. Write the Prescription as you typically would.

Step 2. Click Dx Association.

Step 3. Insert Diagnosis using the box below:

Step 4. Click Accept and Sign the Rx
